

Business Intelligence

NIH's comprehensive business intelligence and analytics application is the central data hub for reporting and data dissemination throughout the NIH. It provides dashboards, reports, data analysis, data visualization, and custom web applications to more than 130 groups including the administrative community of NIH for NBS, Capital HR, and NED.

OFFERINGS

nVision

nVision provides a premier business intelligence solution for NIH staff that is flexible, integrated, scalable, and supports the administrative, scientific, and research mission of the NIH. Areas supported by nVision's capabilities include finance, human resources, travel, acquisition and contracts, supply and replenishment, property, and technology transfer. We are also able to develop custom applications to support NIH business objectives.
